

SkipTrak Skip Hire Software

Skip management at the click of a mouse

SkipTrak skip hire software manages bookings and tracks skips at the click of a mouse. SkipTrak has now developed into the leading skip hire software system sold in over 10 countries and over 250 sites in the UK alone.

Using the graphics based scheduler bookings and skips can be managed effectively. The software allows you to simply move jobs by date or driver without the need to create new records, print off individual job records and daily driver schedules to fully automate your operation.

SkipTrak offers the highest level of customer interaction. With optional extras such as postcode recognition, PDA integration and web tracking, your company could achieve corporate levels of service all for a small business cost. SkipTrak revolutionises the purchase and use of the skip hire industry software. Simply download a demonstration copy to see what a difference it can make to your company. You're just a couple of mouse clicks away from revolutionising the way you manage your skip business.

SkipTrak *in detail*

Job Detail

When raising a new job the customer details are entered automatically. The skip size, due date, driver/vehicle information and also payment information are recorded here. It is then possible to print daily manifests for each vehicle and also delivery/collection notes for customers. Creating an Exchange or Collection is as simple as clicking a button. No additional typing is required.

Scheduler

Using the scheduler you can allocate jobs to drivers, move jobs to a different day or driver. This screen gives you a daily or weekly overview of your current work. The colour scheme makes it easy to track jobs. You can also batch print drivers' tickets or run sheets from here.

PDA

As an optional extra you can send the jobs direct to a driver's PDA. The driver then completes the job, including optional photo and signature, then sends it back to the office

Job Summary

Job No.	Due Date	Type	Account	Surname/Company	Address Line 1	Return Date	Address 2	Postcode	Job Type

63	05/03/2009	3 Cu Yd	A000	AEP Builders	13 Meadow Drive			ST15 2VS	Deliver

The job summary gives you an overview of your work from many different perspectives. By default you are shown today's jobs, one click will show you tomorrow's and so on. You can also filter out certain skip sizes or categories or even types of job, such as collections or exchanges. Searching for an existing job to collect or exchange is simple. There are many ways to find the job you are looking for including postcode, name, any part of the address.

Integration

We realise that most skip companies provide other services such as Trade Waste, Tipper Hire, Haulage, Plant Hire and Waste recycling. At Midsoft we have created a whole suite of systems that can be used on their own or integrated with each other.

A popular combination is to integrate WasteTrak, our weighbridge and waste management system, with SkipTrak. Another important link is to accounting software. We can link to Sage, MYOB, QuickBooks and our accounting system, Summarium. This saves hours of work creating invoices and updating ledgers.

Installation

Installing our software is so simple we offer potential customers a free trial to prove it. Although we offer a full on site installation and training service, many customers opt to install the software themselves. You can be up and running within 15 minutes by just removing our trial data and spending a few minutes setting things up. You can call us if you get stuck as the software includes 12 months technical support which is renewable each year.

Support

It doesn't matter how good and easy to use software is, users will still need to talk to you to discuss problems or require additional assistance. Our support is second to none. All our software incorporates a remote support system, so not only can you talk to a friendly, knowledgeable person you can show them the problem and we usually fix it or explain it to you while you are online.

Invoicing

Bespoke Programming

Although we believe our off the shelf systems offer the best features, there are times when our customers require something more tailored to their own business. We have a portfolio of 19 years worth of systems to draw from when starting new projects. This means that we never have to start completely from scratch, so we can borrow from other systems that have been working for years. All this ensures that we can your new system up and running quicker than the competition and with less problems. Usually customers see something they like in one of our existing Systems and use that as a base to work from. If you require something more suited to your own business contact us for a free demonstration and quotation.
